

## **TC Body-bag**

**Box of 10**                      **£325**  
**Delivery**                      **£20**

Using the newest technology the **TC Body Bag®** is a translucent, self-sealing containment device for human remains. Packed as a single pouch that can be trimmed to fit any size of body or remains, then stored, shipped, or cremated.

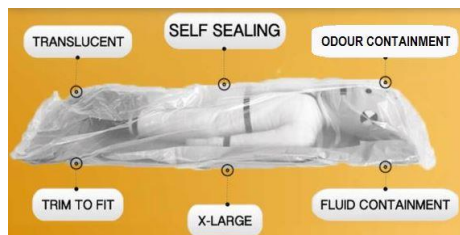

Each bag comes lined with a proprietary adhesive formula that will not stick to any surface other than itself, making it perfectly safe around the delicate tissue of remains. To make your job easier, we have covered the adhesive with a textured, transparent liner that is perforated every 12 inches, giving you the ability to easily remove only the portions needed.

### **The TC Body Bag**
